DRAFT

Site Name: TUTU Wells Site. Inspection of Dept. of Education

Site Address: Highway 314

Persons Conducting Inspection:

(Identify EPA, State, Contractors, PRPs, Public, etc.)

Adrian Schotroff-DPNR, Henning Moe-CDM-FPC(EPA), Sally Odland (CDM-FPC) Ravi (CDM-FPC), Linda Ross (EPA), Mel Hauptman (EPA), Andy Praschak (EPA) C.Kwan (EPA)

Purpose of Inspection:

(Survey, data collection, field work, progress evaluation, etc.)

to inspect the to see if there is any potential release of hazardous waste substances from inside of the building.

Findings, Accomplishments, and Results:

In the Kitchen Equipment/Refrigeration Shop, there is a 4 X 4 cemented sink located in the left corner of the room with a hole at the center bottom for discharges.

In the Plumbing Shop, there are two open one inch holes on the floor and one(sealed) hole 1.5 feet away from the other two holes. When DPNR dipped a pen in one of the holes, a visible sludge were adhered to the pencil. A solvent odor-like was emanating from the pen

In the Mason Shop, there is a sink located at one end of the wall. The sink contains residual of paints. It discharges to outside and the pipe is visible from outside the wall but it gets buried underneath the cemented walkway and ultimately discharges to an above-ground location. The water that get discharge when we turned on the facet is matte-white in color.

Drums of chemical were stacked hap-hazardous outside of the Refrigeration/kitchen equipment shop. The floor where the chemical was stored was discolored.)

Follow-up and Recommendations:

(Correct problems, notification of appropriate EPA/State officials, PRPs, or contractor regarding problems, schedule for resolution, etc.)

Adrian (DPNR) and C.Kwan (EPA) went back Friday afternoon to take pictures of these locations. I contacted ESD to reserve space for soil and sludge samples that EPA would collect in the week of 11/14. I contacted Jose Font from the CFO and
